

# uCertify

The fastest way to IT Certification

## WORK SMARTER, NOT HARDER WITH OUR UNIQUE LEARNING PLATFORM

Does the thought of a test send shivers down your spine? Rather walk on hot coals than take a test? Love to learn, but need help studying? If you want a simple, yet powerful studying tool for you or for your students that is available round the clock, then uCertify is your answer.

[www.ucertify.com](http://www.ucertify.com)

## Overview

At the core of every uCertify Prepkit is our powerful PrepEngine that allows for a sophisticated level of customized learning. The folks at uCertify, understand that *your* time is important. We have created a unique blend of learning and test preparation, the foundation of which is working smarter. Years of experience has gone into the creation of detailed reference material that ensure your learning and practice questions that closely simulate real life technical problems to test your understanding of the subject. Our time tested and continuously improving methodology instantly gives you the benefit of separating the fluff from the real deal. Anticipating your needs and customizing the material to your strengths and weaknesses is at the core of our unique engine. We help you gain the skills you need not just to pass the test, but to actually use them on the job!

uCertify's Prepkits have numerous built-in Study Aids such as Flash Cards, Study Notes, Tagging and more reduce the burden of trying to determine how to sift through vast study material by providing refresher or quick reference at any time. Studies have shown this raises the confidence level of students. The student can on the fly, customize Practice tests and learning, such that the content meets their current levels of knowledge. Immediate, Gap analysis reports tell the student what they need to learn to perform better in a particular subject area. Context sensitive study material and tips help enhance a student's knowledge of a subject area, helping them truly learn the material. This helps improve student performance and productivity on the job for employees. The platform also has the capability for subject matter expertise to be captured and communicated in a consistent manner.

11. Feedback and assessment when you need it, including Gap Analysis that clearly indicate your areas of strength and weakness
12. Full length Final Practice test that closely simulates those on the certification exam to gauge your preparation level for the actual exam

# Features in a Nutshell

## It's Simple

Our mantra. Make it simple. From purchase, to installation, to helping you get started, to helping you step by step through the test process, to our no questions asked money back guarantee, you will find the entire experience refreshingly, simple! The logical organization and layout of the dashboard makes it easy for even the novice user to get started on his learning journey right away.

## Intuitive, User Friendly interface

A simple, intuitive, user friendly interface is the consistent theme of our Prepkits. The interface is consistently well laid out, making it easy to find what you want. Starting from the one-click installation to material is presented in a systematic, logical progression to effortlessly take you from beginning to end without feeling frustrated.

## Personalize to your Learning Style

Everyone learns differently, at their own pace. We, at uCertify, understand this completely. Some folks like to follow a methodical approach. They like their study systematically organized chapter wise and prefer guidance through each step to ensure they are prepared thoroughly for the exam. Some like to jump in first, take practice tests, find out their strong and weak areas and focus accordingly. Yet others want a mixture of both. Our PrepKit can work with any learning style.

## The 'One Click' Dashboard

Most of us, at some or the other, have been lost in a software program's maze of options to find something we need to be

buried deep within a menu option. Given the many features of the PrepKit, a prospective customer may rightfully be fearful of a similar experience. However, the uCertify PrepKit neatly presents all the major options on the first screen that is the dashboard. The options are categorized in three groups: Study & Practice, Study Tools & Guidance, and Assessment. Everything you need to find is available with just one click.

## Guided Learning

Know exactly what you want? You will find our products chock full of features from context based study notes that can be referenced during learning mode to tests that adapt themselves to your strengths and weaknesses on the subject. Don't know where to start? Let us help you get started in your pursuit of your continuing education goals. Our PrepKit can systematically guide you through every step of the learning process from exam objectives, to reference material, study helpers and more, to the exam process of tips, practice tests, continuous assessment until your results show you are ready for the final test.

## From Start to Finish.. our Practice tests

We begin at the very beginning. As the popular song goes, we find it's a very good place to start. The Prepkits clearly state the exam objectives and specifics skills you will need to pass a test. In our experience, this helps provide a focused approach to learning. This is followed by a diagnostic test that helps you determine your strengths and weaknesses in the subject of your choice. Then starts the learning or practice sessions (you choose). First you learn, then you Practice, Practice. Nope.. no repetitive, humdrum drills that send you to sleep. Dozens of real world simulation questions,

carefully crafted by experts in their fields. Each practice test is easily customizable to your subject matter, subtopic or by time. Along the way, immediate assessment reports will tell you how many questions you got right (and wrong!), which areas you need to focus on and more. Finally, are you ready for the real thing? To find out, take our full length, final simulation exam.

## **Exhaustive Study Notes and Reference Guides**

These are neatly organized according to objectives of the actual test. They help you understand a topic clearly and systematically, and more importantly, help you organize your preparation. You can review these study notes and guides at any time, even after passing the test. During the feedback cycle, we don't just present you with the right response. We provide detailed answers elaborating the concept on which the question is based. You can also take a test based on a study note topic, that really helps reinforce concepts just learned.

## **Customizable & Adaptive Testing**

Our tests are extremely customizable. Don't have time to take the standard 40 question practice test? You don't have to. Simply define the number of questions you want to answer. Only have 10 minutes to take a test? Just specify the fixed time you have and we will customize the number of questions for you. Want to master specific study material? You can take a test customized to a specific objective, subtopic, study note or case study. How about raising the level of complexity? No problem. Simply choose to add 'None of the Above' as a possible option to every question. If customized testing as described above wasn't enough, the best part is that each of the tests are also adaptive in nature.

This means we can maximize the precision of the practice tests based on how you answer previous questions. You define how difficult you want the questions to be, when you are ready, not a moment earlier.

## Learning and Test Modes

In Learning mode, you will find a plethora of study aids such as detailed notes, tagging, flash cards to help you remember important facts, interactive pop quizzes to reinforce concepts, the ability to add your own notes and much more. In Test mode, you will be able to gauge where you stand with our quick diagnostic test. Choose as little or as much guidance as you want. Take advantage of adaptive tests that present questions based your weak areas, track your progress, pace yourself and much more. We guarantee our methodology will work!

## Study Helpers

Reference Notes and Study Guides are organized according to the actual test objective. They help you understand the topics clearly and systematically, assist you in difficult areas and help organize your study plan. This material provides an in-depth study of different topics, similar to an easy to look-up reference guide. Interactive pop quizzes along the way help you test your knowledge on a particular topic. They help determine whether you go on to the next topic or spend more time on this one. Flash Cards help you memorize definitions, terminology, key concepts and more. Questions flash on the screen and you choose the correct answer. This simple, yet powerful feature helps drill in basic concepts that are key to mastering more extensive material. Studies have shown that this type of quick check on fundamentals consistently increases the confidence levels of students.

## Technical Articles and How to's

Go beyond the basics. Our technical Study Articles section contains information written by industry experts and is sure to tremendously enhancing your knowledge of the subject. How To's provide an easy to look up reference to specific questions that ask 'how to' perform a particular action.

## Collaboration Tools

Do you have **feedback** for us on a question? One click allows you to **rate** a question as well as provide detailed feedback. Have friends and colleagues that will be taking the same test? **Discuss it!** Is a neat feature that allows you to discuss a question with other users. Provide your comments and respond to comments from others. Share your ideas and benefit from input/feedback from other users.

## Continuous feedback & Assessment

Starting with our diagnostic tests that show you where you stand initially, our continuous feedback gives you a precise idea of your exam readiness. Dive right into practice tests or study a specific material and quiz yourself. Our assessment reports can be generated by exam objective where you can find out exactly where you stand for each exam objective. Alternatively, you can be assessed on the type of test taken, for example, how you scored on your diagnostic test, how many and which practice tests you took, and what your aggregate score was on each of the tests. You can choose to review material, or take/retake tests based on your assessment report.

After every test or quiz, you will get detailed feedback on your results. What is the passing score, your answer, the correct answer, whether your answer is correct or not, and

your final score. For incorrect answers, simply click on a question to find the correct answer highlighted and get an explanation of the answer. Summary reports shows a breakdown of your performance categorized by subtopic. The easy to read reports clearly show how ready you are and what to focus on.

In addition, because we track your progress on an ongoing basis, our historical performance review will present a graph illustrating your performance over the various tests you have taken. This helps you review your progress over time and accurately assess your test readiness.

## Little Extras

**Pause the test:** Need your coffee? Must take a break? Kids hollering? Or your manager breathing down your neck for a report that he needs now? There are times you think you have the time to complete a test, but need to take a break for some reason. You may pause a test at any time and come back to the same point in the test later.

**Keyboard shortcuts:** Navigate like a pro using our keyboard shortcuts for frequently used options. Select options and navigate without lifting your fingers from the keyboard.

**Bookmarks and Tags:** Find something interesting or particularly hard? Bookmark it for easy future reference, or **Tag it.** A one click Item Review will allow you access bookmarked items easily. The best part about tagging something is that you can create custom tests based on the questions you tagged.

**My Comments:** A popular feature that allows you to attach your own notes to questions, facts, study guides and more. These comments that you jot down may be reviewed at any

time, making studying more organized and simpler.

**Test Preparation Tips:** Our products are generously sprinkled with helpful test preparation tips, including specific test related advice, what to practice, tests review and much more to guide you on successfully completing the test preparations. Customers often tell us that these tips give them excellent insight into their subject matter.
