

uCertify

Course Outline

Data Science with Jupyter

26 Apr 2025

1. Pre-Assessment
2. Exercises, Quizzes, Flashcards & Glossary
Number of Questions
3. Expert Instructor-Led Training
4. ADA Compliant & JAWS Compatible Platform
5. State of the Art Educator Tools
6. Award Winning Learning Platform (LMS)
7. Chapter & Lessons
Syllabus
Chapter 1: Preface
Chapter 2: Data Science Fundamentals
Chapter 3: Installing Software and Setting Up
Chapter 4: Lists and Dictionaries
Chapter 5: Function and Packages
Chapter 6: NumPy Foundation
Chapter 7: Pandas and DataFrame
Chapter 8: Interacting with Databases
Chapter 9: Thinking Statistically in Data Science
Chapter 10: How to import data in Python?
Chapter 11: Cleaning of Imported Data
Chapter 12: Data Visualization
Chapter 13: Data Pre-processing
Chapter 14: Supervised Machine Learning
Chapter 15: Unsupervised Machine Learning
Chapter 16: Handling Time-Series Data
Chapter 17: Time-Series Methods
Chapter 18: Case Study-1
Chapter 19: Case Study-2

Chapter 20: Case Study-3

Chapter 21: Case Study-4

Videos and How To

8. Practice Test

Here's what you get

Features

9. Performance Based labs

Lab Tasks

Here's what you get

1. Pre-Assessment

Pre-Assessment lets you identify the areas for improvement before you start your prep. It determines what students know about a topic before it is taught and identifies areas for improvement with question assessment before beginning the course.

2. Expert Instructor-Led Training

uCertify uses the content from the finest publishers and only the IT industry's finest instructors. They have a minimum of 15 years real-world experience and are subject matter experts in their fields. Unlike a live class, you can study at your own pace. This creates a personal learning experience and gives you all the benefit of hands-on training with the flexibility of doing it around your schedule 24/7.

3. ADA Compliant & JAWS Compatible Platform

uCertify course and labs are ADA (Americans with Disability Act) compliant. It is now more accessible to students with features such as:

- Change the font, size, and color of the content of the course
- Text-to-speech, reads the text into spoken words

- Interactive videos, how-tos videos come with transcripts and voice-over
- Interactive transcripts, each word is clickable. Students can clip a specific part of the video by clicking on a word or a portion of the text.

JAWS (Job Access with Speech) is a computer screen reader program for Microsoft Windows that reads the screen either with a text-to-speech output or by a Refreshable Braille display. Student can easily navigate uCertify course using JAWS shortcut keys.

4. State of the Art Educator Tools

uCertify knows the importance of instructors and provide tools to help them do their job effectively. Instructors are able to clone and customize course. Do ability grouping. Create sections. Design grade scale and grade formula. Create and schedule assessments. Educators can also move a student from self-paced to mentor-guided to instructor-led mode in three clicks.

5. Award Winning Learning Platform (LMS)

uCertify has developed an award winning, highly interactive yet simple to use platform. The SIIA CODiE Awards is the only peer-reviewed program to showcase business and education technology's finest products and services. Since 1986, thousands of products, services and solutions have been recognized for achieving excellence. uCertify has won CODiE awards consecutively for last 7 years:

- **2014**
 1. Best Postsecondary Learning Solution
- **2015**
 1. Best Education Solution
 2. Best Virtual Learning Solution
 3. Best Student Assessment Solution
 4. Best Postsecondary Learning Solution
 5. Best Career and Workforce Readiness Solution
 6. Best Instructional Solution in Other Curriculum Areas
 7. Best Corporate Learning/Workforce Development Solution

- **2016**
 1. Best Virtual Learning Solution
 2. Best Education Cloud-based Solution
 3. Best College and Career Readiness Solution
 4. Best Corporate / Workforce Learning Solution
 5. Best Postsecondary Learning Content Solution
 6. Best Postsecondary LMS or Learning Platform
 7. Best Learning Relationship Management Solution

- **2017**
 1. Best Overall Education Solution
 2. Best Student Assessment Solution
 3. Best Corporate/Workforce Learning Solution
 4. Best Higher Education LMS or Learning Platform

- **2018**
 1. Best Higher Education LMS or Learning Platform
 2. Best Instructional Solution in Other Curriculum Areas
 3. Best Learning Relationship Management Solution

- **2019**
 1. Best Virtual Learning Solution
 2. Best Content Authoring Development or Curation Solution
 3. Best Higher Education Learning Management Solution (LMS)

- **2020**
 1. Best College and Career Readiness Solution
 2. Best Cross-Curricular Solution
 3. Best Virtual Learning Solution

6. Chapter & Lessons

uCertify brings these textbooks to life. It is full of interactive activities that keeps the learner engaged. uCertify brings all available learning resources for a topic in one place so that the learner can efficiently learn without going to multiple places. Challenge questions are also embedded in the chapters so learners can attempt those while they are learning about that particular topic. This helps them grasp the concepts better because they can go over it again right away which improves learning.

Learners can do Flashcards, Exercises, Quizzes and Labs related to each chapter. At the end of every lesson, uCertify courses guide the learners on the path they should follow.

Syllabus

Chapter 1: Preface

Chapter 2: Data Science Fundamentals

- What is Data?
- What is Data Science?
- What a Data Scientist actually do?
- Real world use cases of Data Science?
- Why Python for Data Science?
- Conclusion

Chapter 3: Installing Software and Setting Up

- System Requirements
- Downloading the Anaconda

- Installing the Anaconda in Windows
- Installing the Anaconda in Linux
- How to install a new Python library in Anaconda
- Open your notebook- Jupyter
- Know your notebook
- Conclusion

Chapter 4: Lists and Dictionaries

- What is list?
- How to create a list?
- Different list Manipulation operations
- Difference between lists and tuples
- What is dictionary?
- How to create a dictionary?
- Some operations with dictionary
- Conclusion

Chapter 5: Function and Packages

- Help() function in Python

- How to import a Python package?
- How to create and call a function?
- Passing parameter in a function
- Default parameter in a function
- How to use unknown parameters in a function?
- Global and Local variable in a function
- What Is Lambda Function?
- Understanding Main in Python
- Conclusion

Chapter 6: NumPy Foundation

- Importing a NumPy package
- Why NumPy array over List?
- NumPy array Attributes
- Creating NumPy arrays
- Accessing element of a NumPy array
- Slicing in NumPy array
- Array Concatenation

- Conclusion

Chapter 7: Pandas and DataFrame

- Importing Pandas
- Pandas Data Structures
- .loc[] and .iloc[]
- Some Useful DataFrame Functions
- Handling missing values in DataFrame
- Conclusion

Chapter 8: Interacting with Databases

- What is SQLALchemy?
- Installing SQLALchemy Package
- How to use SQLAlchemy?
- SQLAlchemy Engine Configuration
- Creating A Table In Database
- Inserting Data In a Table
- Update a record

- How to join two tables
- How to join two tables
- Conclusion

Chapter 9: Thinking Statistically in Data Science

- Statistics in Data Science
- Types of Statistical data/variables?
- Mean, Median and Mode
- Basics of Probability
- Statistical Distributions
- Pearson Correlation Coefficient
- Probability Density Function (PDF)
- Real World Example
- Statistical Inference and Hypothesis Testing
- Conclusion

Chapter 10: How to import data in Python?

- Importing txt data
- Importing csv data

- Importing Excel data
- Importing JSON data
- Importing pickled data
- Importing a compressed data
- Conclusion

Chapter 11: Cleaning of Imported Data

- Know your data
- Analysing Missing Values
- Dropping Missing Values
- Automatically Fill Missing Values
- How to scale and normalize data?
- How to Parse Dates?
- How to apply character encoding?
- Conclusion

Chapter 12: Data Visualization

- Bar Chart

- Line Chart
- Histograms
- Scatter Plot
- Stacked Plot
- Box Plot
- Conclusion

Chapter 13: Data Pre-processing

- About the case-study
- Importing the dataset
- Exploratory Data Analysis
- Data Cleaning & Pre-processing
- Feature Engineering
- Conclusion

Chapter 14: Supervised Machine Learning

- Some common ML Terms
- Introduction to Machine Learning (ML)
- List of common ML Algorithms

- Supervised ML Fundamentals
- Solving a Classification ML Problem
- Solving a Regression ML Problem
- How to Tune your ML Model?
- How to handle categorical variable in sklearn?
- Advanced technique to handle missing data
- Conclusion

Chapter 15: Unsupervised Machine Learning

- Why Unsupervised Learning?
- Unsupervised Learning Techniques
- Clustering
- Principal Component Analysis (PCA)
- Case Study
- Validation of Unsupervised ML
- Conclusion

Chapter 16: Handling Time-Series Data

- Why Time-Series is important?
- How to handle Date and Time?
- Transforming a Time Series Data
- Manipulating a Time Series Data
- Comparing Time Series Growth Rates
- How to change Time Series Frequency?
- Conclusion

Chapter 17: Time-Series Methods

- What is Time-Series forecasting?
- Basic Steps in Forecasting
- Time Series Forecasting Techniques
- Forecast future traffic to a Web page
- Conclusion

Chapter 18: Case Study-1

- Case Study 1: Predict whether or not an applicant will be able to repay a loan
- Conclusion

Chapter 19: Case Study-2

- Conclusion

Chapter 20: Case Study-3

Chapter 21: Case Study-4

7. Practice Test

Here's what you get

Features

Each question comes with detailed remediation explaining not only why an answer option is correct but also why it is incorrect.

Unlimited Practice

Each test can be taken unlimited number of times until the learner feels they are prepared. Learner can review the test and read detailed remediation. Detailed test history is also available.

Each test set comes with learn, test and review modes. In learn mode, learners will attempt a question and will get immediate feedback and complete remediation as they move on to the next question. In test mode, learners can take a timed test simulating the actual exam conditions. In review mode, learners can read through one item at a time without attempting it.

8. Performance Based Labs

uCertify's performance-based labs are simulators that provides virtual environment. Labs deliver hands on experience with minimal risk and thus replace expensive physical labs. uCertify Labs are cloud-based, device-enabled and can be easily integrated with an LMS. Features of uCertify labs:

- Provide hands-on experience in a safe, online environment
- Labs simulate real world, hardware, software & CLI environment
- Flexible and inexpensive alternative to physical Labs
- Comes with well-organized component library for every task
- Highly interactive - learn by doing
- Explanations and remediation available
- Videos on how to perform

Lab Tasks
